

The 12th International Conference on Ubi-Media Computing (Ubi-Media 2019)

<http://2019.umedconf.com/>
Bali, Indonesia, August 6-9, 2019

General Co-Chairs

Susanto Rahardja, Northwestern Polytechnical University, China
Nam Ling, Santa Clara University, USA
Timothy K. Shih, National Central University, Taiwan
Ford Lumban Gaol, Bina Nusantara, Indonesia

Conference Co-Chairs

Untung Rahardja, STMIK Raharja, Indonesia
Mima Adriani, University of Indonesia, Indonesia
Yoshitaka Shibata, Iwate Prefectural University, Japan
Chuan-Yu Chang, National Yunlin University of Science and Technology, Taiwan
Chih-Lin Hu, National Central University, Taiwan
Zhifeng Chen, Fuzhou University, China

Program Co-Chairs

Lin Hui, Tamkang University, Taiwan
Yi-Cheng Chen, National Central University, Taiwan
Yuhong Liu, Santa Clara University, USA
Kheong Sann Chan, Nanjing Institute of Technology, China

Workshop Co-Chairs

Somchoke Ruengittinun, Kasetsart University, Thailand
Tokunbo Ogunfunmi, Santa Clara University, USA
Wu-Yuin Hwang, National Central University, Taiwan
Chih-Yang Lin, Yuan-Ze University, Taiwan

Publicity Co-Chairs

Abas Sunarya, STMIK Raharja, Indonesia
Hui-Huang Hsu, Tamkang University, Taiwan
Pattanasak Mongkolwat, Mahidol University, Thailand
K. P. Hewagama, University of Colombo School of Computing, Sri Lanka
Amartuvshin Amarzaya, National University of Mongolia, Mongolia

Local Arrangement Co-Chair

Qurotul Aini, STMIK Raharja, Indonesia
Chiou-Ying Lee, LungHwa University of Sci. and Tech., Taiwan

Publication Co-Chairs

Chun-Hsiung Tseng, Yuan Ze University, Taiwan
Ankhtuya Ochirbat, National University of Mongolia, Mongolia

Financial Co-Chairs

Yung-Hui Chen, LungHwa University of Sci. and Tech., Taiwan
Ching-Sheng Wang, Aletheia University, Taiwan

Web Co-Chairs

Noorkholis Luthfil Hakim, National Central University, Taiwan
Chalothon Chootong, Kasetsart University Sriracha Campus, Thailand

Events in the cyberspace can be modeled as a spatiotemporal continuity populated by computing devices, communication channels, and multimodal interactions. Contemporary ubiquitous devices unleash the boundary of one-to-one human-computer interaction. E.g., it has become a de facto style of facilitating social events that participants use several distributed devices through multimodal interaction. How people access multimodal media in different context is an interesting yet challenging problem. Ubi-media Computing, as it is bravely defined, brings together technologies for location/context adaptation, inter-device interaction/reaction, and media/data communication.

In line with the blooming technologies realizing the above concepts, this international conference looks at the state-of-the-art and original research issues to be published in the proceedings. New contributions include three perspectives: devices that realize ubiquitous computing, multimodal interactions between human and these ubiquitous devices, and the need of adaptive multimedia.

The conference proceedings will be published by Conference Publishing Services (CPS), with best papers recommended for publication in special issues of international journals. Topics of interests include but not limit to the following:

- Ubi-Media Infrastructure/Systems
 - Wireless and mobile networking for ubiquitous multimedia
 - Mobility computing systems, Peer-to-peer networking
 - Network architectures, protocols, and algorithms
 - Ad hoc and sensor network, Cross-layer design
 - Advanced communication techniques, Smart objects
 - Cognitive computing in Ubi-Media Systems
- Ubi-Media Middleware & Tools
 - Adaptive, autonomic and context-aware computing
 - Cross-network media server, Computational intelligences
 - Semantic web and knowledge grid, Content protection
 - Privacy & security in ubiquitous environments
 - Agent technologies, Human-computer interaction
 - Programming models for Ubi-Media, Knowledge representation and ontology
- Ubi-Media Services and Managements
 - Service provisioning for ubiquitous multimedia
 - Quality of service, Resource sharing and service discovery
 - Location-based services, Context-aware services
 - Tracking in ubiquitous environments, Operating system support
 - Data replication, migration and dissemination for ubiquitous multimedia
- Ubi-Media Applications
 - Ubi-media for education / commerce, Ubi-media for entertainment / games
 - Ubi-media for medical / health care, Ubi-media for smart home / smart city
 - Ubi-media for citizens and E-government, Ubi-media for intelligent mobility
 - Ubi-media for environmental protection, Ubi-media for public safety and security
 - Innovative Ubi-Media applications

Proceeding: All accepted papers in Ubi-Media2019 will be published by Conference Publishing Services (CPS), and be submitted for indexing by EI Compendex and Scopus Index.

IMPORTANT DATES

Paper Submission: March 1, 2019 – April 30, 2019
Final Manuscript Due: May 15, 2019 – May 31, 2019

Author Notification: April 15, 2019 – May 10, 2019
Early Registration Due: June 1, 2019 – June 10, 2019

MANUSCRIPT FORMAT

Do not exceed 6 single-space double column, 8.5 x 11-inch pages (including figures, tables and references) in 11 point Times Roman or similar font. Number each page. Include an abstract, five to ten keywords, the technical area(s) most relevant to your paper, and the corresponding author's e-mail address. Submissions should represent original, substantive research results. We will not accept any paper which, at the time of submission, is under review for or has already been published (or accepted) for publication in another conference or journal.

SUBMISSION DETAILS

Submitted papers will be carefully evaluated based on originality, significance, technical soundness, and clarity of exposition. All papers will be refereed by at least two members of the program committee. All submitted papers MUST be formatted according to the author guidelines provided by Conference Publishing Services (CPS) (two-column format) and MUST NOT be longer than SIX pages.
